ABOUT  
GREEN SCHOOL BALI  
EVER!!!

## SCHOOL = AWARENESS, JOY & FUN

What you see in the picture is not a 3D model or mock-up - it's reality.

What's more, it's the school that won the "Greenest School on Earth" award in 2012!

Do you love children and nature? Welcome to a unique international school that enchants not only at first sight, but also by its educational vision of respectful human effort and care for future generations.

Green School Bali manifests dreams, interwoven with gratitude and love, in an untouched tropical jungle. Its deference to nature reflects a global awareness that promotes eco-consciousness and sustainability.

After then volunteering in Africa and Sri Lanka, I again found myself on the "The Island of The God's," where my real adventure began. In the womb of nature, I witnessed the birth of a New Green Planet, full of joy, abundance and bliss. A pristine ambience and spiritually aware teachers nurture children's creativity, according to holistic principles, cherishing their gifts and talents.

My volunteer mission resulted in this authentic treatise, one purpose of which is to support the scholarship fund for Indonesian children and also inspire parents, teachers and the public to more consciously care for the environment, their children, and each other.

If you are interested in education, the environment and world-class innovation, then this publication is for you! It contains inspiring examples of the organization and activities of the Green School, complemented by volunteer testimonials, and the vision of a future "gift economy."

I am writing with faith and hope, let us all be well on Earth ♥♥♥

Don't hesitate to purchase this 124-page e-book, full of fabulous pictures, it costs € 13 (option in pdf format):

### Welcome to the Green School Bali

*Perfect communion with nature is enhanced by the fact that individual buildings and classes have no walls, windows or doors. They are naturally constructed, open-air spaces!*

*Current enrollment is 331 children, aged 6-18, from 38 countries. In June 2013, a ceremony was held for the first 17 graduates of the school.*

*The on-campus kindergarten enrolls children as young as two and a half!*
